BookSwap Hub

03/23/2025

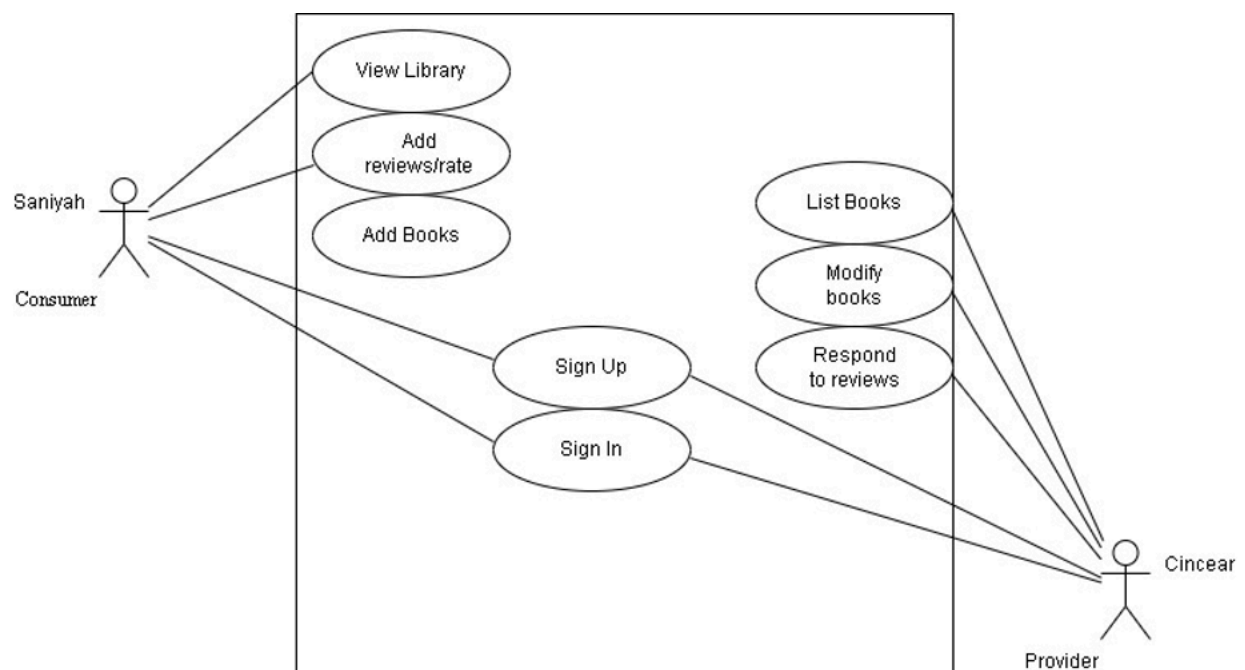

Version 1

Cincear Weaver & Saniyah Khan

1. PROJECT OVERVIEW

The goal of BookSwap Hub is a community-driven app designed to facilitate book exchanges between users. Providers are able to list books that they want to swap using key identifiers like Author, Title, and Year. The user is presented with a library of books that they are able to search using key identifiers. Users can also leave reviews and rate the providers which can also be seen during the search.

2. USE- CASE MODEL

3. Database Schema

May need to zoom-in to see the schema clearly.
